SUMMARY

Result-oriented DevOps Engineer with hands-on experience in AWS cloud services, CI/CD pipelines, infrastructure automation, and containerized deployments. Skilled in Terraform, Ansible, Docker, Kubernetes, and monitoring tools (Prometheus, Grafana). Achieved reduction in deployment time and improvement in system uptime. Adept at streamlining processes and delivering scalable, secure cloud solutions. Seeking to contribute to innovative DevOps projects.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, EBS, VPC, ELB, Lambda, EKS, ECS, SNS, SQS, ECR, CloudFront, CloudWatch, NAT Gateways, API Gateway)

CI/CD & Version Control: Git, GitHub, GitLab, Jenkins (CI), Jenkins X (CD), SonarQube, Maven, Nexus,

Infrastructure as Code: Terraform, Ansible

Networking & Security: Routing, Subnetting, Security Policies, IAM

Containers & Orchestration: Docker, Kubernetes

Programming & Scripting: Python, Bash, Groovy, YAML

Monitoring & Logging: Prometheus, Grafana, ELK Stack

Operating Systems: Linux (Ubuntu), Windows

Deployment Strategies: Blue-Green Deployment, Rolling Deployment

PROJECTS

Blue-Green Deployment on AWS using Kubernetes (kOps) |

Feb 2026

Technologies: AWS (EC2, S3, ELB), Kubernetes, kOps, Docker, Nginx, Tomcat

- Designed and deployed a Kubernetes cluster on AWS using kOps with S3 state store.
- Implemented **Blue-Green deployment strategy** using dual Deployments and a single Load Balancer Service.
- Integrated systematized testing and monitoring, ensuring uptime.
- Achieved **zero-downtime releases** by dynamically switching traffic between application versions using Kubernetes Service selectors.
- Configured AWS ELB for external traffic routing and managed NodePort services.
- Resolved real-world production issues including **port mismatches, immutable selectors, ELB health check failures, and security group misconfigurations**.
- Performed instant rollback by updating Service selector without redeploying Pods.

DevSecOps CI/CD Pipeline – Zomato Web Application |

Jan 2026

Technologies: Jenkins, Docker, SonarQube, Trivy, OWASP Dependency Check, AWS EC2, GitHub

- Built an **end-to-end DevSecOps CI/CD pipeline** using Jenkins for systematized build, test, scan, and deployment stages.
- Integrated **SonarQube** for static code analysis and enforced Quality Gates.
- Implemented **OWASP Dependency-Check** and **Trivy** for file system and Docker image vulnerability scanning.
- Mechanized Docker image build and push to Docker Hub using secure Jenkins credentials.
- Deployed containerized application on AWS EC2 with Enabled rollback capability.
- Improved deployment reliability and reduced manual intervention through pipeline computerized.

Infrastructure as Code (IaC) with Terraform |

Dec 2025

Technologies: AWS (EC2, S3, VPC), GitHub

- Designed and provisioned complete AWS infrastructure using **Terraform Infrastructure as Code (IaC)**.
- Created reusable modules for VPC, EC2, and S3 resources.
- Enabled version-controlled and repeatable infrastructure deployments.

Automated Backup & Recovery System |

Dec 2025

Technologies: Bash, Python, Ansible, AWS S3

- Developed automated backup scripts using Bash and Python for databases and server files.
- Configured scheduled backups and secure storage in AWS S3.
- Reduced manual backup effort and improved disaster recovery readiness.

EXPERIENCE (ACADEMIC PROJECTS)

Mar 2025

DevOps & Cloud Engineering

Technologies: Jenkins, Git, AWS, Terraform, Ansible, Docker, Kubernetes, Monitoring & Logging Tools

- Built CI/CD pipelines using Jenkins and Git-based workflows.
- Provisioned cloud infrastructure using Infrastructure as Code.
- Containerized applications and deployed using orchestration tools.
- Enforced monitoring, logging, and basic security practices.
- Followed SDLC processes including development, testing, deployment, and documentation
- Participated across SDLC phases including design, development, testing, deployment, and support.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering
Gnanamani College of Technology (Anna University), Namakkal, Tamil Nadu, May 2021 – May 2025 | CGPA: 7.64/ 10

Senior Secondary (Class XII)

+2 Ayodhya prasad H/S AyodhyaGanj, Katihar [🔗](#)

03/2020

Secondary (Class X)

AP High School Ayodhyaganj, Katihar [🔗](#)

06/2018

CERTIFICATIONS

- **Networking Essentials Certificate** – Cisco Networking Academy (View Certificate)
- **Advanced Kubernetes Bootcamp** – Udemy (View Certificate)
- **DevOps Tool for Beginners** – Udemy (View Certificate)
- **Web Development Certificate** – GTL Software Pvt. (View)

KEY ACHIEVEMENTS

- Strong understanding of DevOps and cloud fundamentals
- Hands-on experience through academic and personal projects.
- Good problem-solving and automation mindset
- Willingness to learn and adapt in fast-paced environments
