PROFILE

Result-oriented DevOps Engineer with hands-on experience in AWS cloud services, CI/CD pipelines, infrastructure automation, and containerized deployments. Skilled in Terraform, Ansible, Docker, Kubernetes, and monitoring tools (Prometheus, Grafana). Achieved reduction in deployment time and improvement in system uptime. Adept at streamlining processes and delivering scalable, secure cloud solutions. Seeking to contribute to innovative DevOps projects in an MNC environment.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, EBS, VPC, ELB, Lambda, EKS, ECS, SNS, SQS, ECR, CloudFront, CloudWatch, NAT Gateways, API Gateway)

CI/CD & Version Control: Git, GitHub, GitLab, Jenkins (CI), Jenkins X (CD), SonarQube, Maven, Nexus,

Infrastructure as Code: Terraform, Ansible

Networking & Security: Routing, Subnetting, Security Policies, IAM

Containers & Orchestration: Docker, Kubernetes

Programming & Scripting: Python, Bash, Groovy, YAML

Monitoring & Logging: Prometheus, Grafana, ELK Stack

Operating Systems: Linux (Ubuntu), Windows

Deployment Strategies: Blue-Green Deployment, Rolling Deployment

PROJECTS

Portfolio Website |

Jan 2025

Technologies: AWS, GitHub, GitLab, Jenkins

- Designed and deployed a portfolio website on AWS, mechanized CI/CD deployments, reducing release time.
- Reduced manual deployment time and boosted version control accuracy.
- Integrated systematized testing and monitoring, ensuring uptime.

CI/CD Automation Project |

Mar 2025

Technologies: Jenkins, GitLab, Docker, Kubernetes

- Built a complete CI/CD pipeline for a sample web application, systematized build, test, and deployment stages.
- Applied Docker containerization and Kubernetes orchestration enhanced deployment speed.
- Incorporated monitoring using Prometheus and Grafana, reducing incident response.

Infrastructure as Code (IAC) with Terraform

Technologies: Terraform, AWS (VPC, EC2, S3), Git

- Designed and executed Terraform scripts to provision complete cloud infrastructure including VPC, EC2 instances, and S3 storage.
- Enabled version-controlled, repeatable infrastructure deployments, reducing setup.
- Blended Terraform with GitHub Actions for a computerized provisioning on code changes.

Automated Backup and Recovery System

Technologies: Bash, Python, Ansible, AWS S3

- Developed automated backup scripts for databases and server files, storing backups securely in AWS S3.

- Included systematized verification and restore testing to ensure data integrity.
- Managed deployment of backup tasks across multiple servers using Ansible, reducing manual.
- Merged static code analysis and security scanning using SonarQube.

EXPERIENCE (ACADEMIC PROJECTS)

DevOps & Cloud Engineering

Technologies: Jenkins, Git, AWS, Terraform, Ansible, Docker, Kubernetes, Monitoring & Logging Tools

- Built CI/CD pipelines using Jenkins and Git-based workflows.
- Provisioned cloud infrastructure using Infrastructure as Code.
- Containerized applications and deployed using orchestration tools.
- Enforced monitoring, logging, and basic security practices.
- Followed SDLC processes including development, testing, deployment, and documentation
- Participated across SDLC phases including design, development, testing, deployment, and support.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering
Gnanamani College of Technology (Anna University), Namakkal, Tamil Nadu, May 2021 – May 2025 | CGPA: 7.64/ 10

Senior Secondary (Class XII)

+2 Ayodhya prasad H/S AyodhyaGanj, Katihar [🔗](#)

03/2020

Secondary (Class X)

AP High School Ayodhyaganj, Katihar [🔗](#)

06/2018

CERTIFICATIONS

- **Networking Essentials Certificate** – Cisco Networking Academy (View Certificate)
- **Web Development Certificate** – GTL Software Pvt. Ltd. (View Certificate)
- **Virtual Internship (Web Development - CODE ALPHA)** (View Certificate)
- **Advanced Kubernetes Bootcamp** – Udemy
- **DevOps Tool for Beginners** – Udemy

KEY ACHIEVEMENTS

- Strong understanding of DevOps and cloud fundamentals
- Hands-on experience through academic and personal projects.
- Good problem-solving and automation mindset
- Willingness to learn and adapt in fast-paced environments
- incorporated **static code analysis** into the CI/CD pipeline using **SonarQube**.
- Performed **basic security scanning** to identify code quality issues and vulnerabilities early.
Used SonarQube reports to understand **code smells, bugs, and security warnings**.
