SUMMARY

DevOps Engineer with 1 year of hands-on internship experience building cloud infrastructure, end-to-end CI/CD pipelines, and containerized deployments on AWS. Proficient in Kubernetes, Docker, Terraform, Ansible, and Jenkins, with a strong focus on DevSecOps practices, zero-downtime release strategies, and system observability.

SKILLS

Cloud (GCP): Compute Engine, Cloud Storage, Persistent Disk, VPC, Cloud Load Balancing, Cloud Functions, Firestore, Cloud Run, GKE, Artifact Registry, Pub/Sub, Cloud CDN, Cloud Monitoring, API Gateway, Deployment Manager, Managed Instance Groups, Cloud NAT, Cloud Armor, VPC Firewall Rules, Cloud IAM, Cloud Logging.

Cloud (AWS): EC2, S3, EBS, VPC, ELB, Lambda, Fargate, ECS, EKS, ECR, SNS, SQS, CloudFront, CloudWatch, API Gateway, CloudFormation, Auto Scaling, NAT Gateway, WAF, Network ACLs, AWS Global Accelerator

CI/CD & DevSecOps: Jenkins, GitHub Actions, GitLab CI/CD, SonarQube, Maven, Nexus, Trivy, OWASP Dependency-Check, Docker Hub, Pipeline Monitoring

Infrastructure as Code: Terraform (modules, remote state, state locking), Ansible (playbooks, roles), CloudFormation, YAML

Containers & Orchestration: Docker; Kubernetes - Deployments, Services, Pods, Namespaces, ConfigMaps, Secrets, Ingress, RBAC, CronJobs, NodePort, LoadBalancer, StatefulSets, DaemonSets, HPA, PV/PVC, Helm, Cluster Autoscaling

Monitoring & Observability: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), CloudWatch

Version Control: Git, GitHub, GitLab - GitFlow branching, pull requests, code review

Scripting & Programming: Bash, Python, PowerShell, Groovy, Shell scripting

Networking & Security: Linux (Ubuntu), TCP/IP, IP subnetting, IAM, SSH, SSL/TLS, Network Firewall

EXPERIENCE

DevOps Engineer Intern, JSpiders – Training & Development Center

July 2025 – July 2026

Marathahalli, Bengaluru, Karnataka

- Designed and maintained CI/CD pipelines in Jenkins with Git webhook triggers across 8 microservices, cutting release cycle time through automated build, test, and security-scan stages.
- Provisioned scalable AWS infrastructure (EC2, VPC, S3, ELB, IAM) via Terraform, standardizing 3 environments and cutting manual provisioning time.
- Containerized microservices with Docker and deployed on Kubernetes, configuring Ingress, ConfigMaps, Secrets, and RBAC across 4 namespaces.
- Embedded SonarQube, Trivy, and OWASP Dependency-Check into the CI workflow, scanning dependencies and remediating vulnerabilities before release.
- Established observability via Prometheus, Grafana, and the ELK Stack, cutting incident detection and response time by across 8 services.
- Administered 6+ Linux servers (Ubuntu, CentOS) and built 5 reusable Ansible playbooks, reducing server setup time by.

PROJECTS

Blue-Green Deployment on GCP with Kubernetes (GKE)

Compute Engine, Cloud Storage, Cloud Load Balancing, GKE, Docker, Nginx, Tomcat, Terraform

- Stood up a production-grade Kubernetes cluster on AWS via kOps with S3 as the remote state store, supporting 5 nodes with zero unplanned downtime.
- Architected a Blue-Green model with dual Deployments behind a single ELB, cutting failover time to under 10 seconds and eliminating deployment-related downtime.

DevSecOps CI/CD Pipeline – Zomato Clone Application

Jenkins, Docker, SonarQube, Trivy, OWASP, AWS EC2, Ansible

- Built a Jenkins pipeline spanning Maven build, static analysis, and vulnerability scanning, cutting deployment time from ~20 minutes (manual) to under 3 minutes.
- Enforced SonarQube quality gates and instant rollback logic, eliminating 90%+ of manual deployment effort and reducing.

Infrastructure as Code (IaC) on AWS with Terraform

AWS EC2, S3, VPC, Terraform, Ansible, GitHub

- Authored modular Terraform configs for VPC, EC2, IAM, and S3 with DRY principles, cutting infrastructure provisioning time across 3 environments.
- Provisioned and managed AWS infrastructure using Terraform and Ansible, implementing reusable configurations and automated deployments across multiple environments.

EDUCATION

B.E., Computer Science and Engineering — CGPA: 7.48/10

May 2021 – May 2025

Gnanamani College of Technology, Anna University, Namakkal, Tamil Nadu

CERTIFICATIONS

- DevOps Engineer Training Certificate – JSpiders Software Training (Linux, Docker, Kubernetes, AWS, CI/CD, Jenkins)
- Advanced Kubernetes Bootcamp – Udemy (Cluster management, production-grade deployments)
- Networking Essentials – Cisco Networking Academy (Network fundamentals, routing & switching)
- DevOps Tools for Beginners – Udemy (CI/CD pipelines, DevOps toolchain fundamentals)
